*Specializing in Diseases and Surgery
 of the Retina and Vitreous*

Alexander Izad, M.D., F.A.C.S.

Dr. Izad earned his Doctor of Medicine degree from the Karolinska Institute in Sweden, one of the top-ranked medical universities in the world. He was also a visiting scholar at Harvard Medical School, Brown University, Emory University and Thomas Jefferson University Schools of Medicine. He completed his internship at Yale University School of Medicine and finished his residency in Ophthalmology at the State University of New York Upstate Medical University. He served as Chief resident during his training. He completed his fellowship training in Vitreoretinal Disease and Surgery at the University of Texas Medical Branch in Galveston and the University of Texas Medical School at Houston.

He began his career as an Assistant Professor of Ophthalmology at the University of Arizona College of Medicine and as the Director of Retina at the Southern Arizona VA Health Care System in Tucson. He continued his career in private practices in North Texas and Southern California.

Dr. Izad has been actively involved in clinical research, serving as the principal investigator for many national research trials. He has published peer-reviewed articles and book chapters and lectured extensively on various subjects in retinal diseases and surgery. He is board certified by the American Board of Ophthalmology and is a Fellow of the American College of Surgeons. He is an active member of numerous professional organizations including the American Society of Retina Specialists and the American Academy of Ophthalmology. In his free time he enjoys spending time with his family, running and hiking.

Commitment to Uncompromising Care

Our board-certified, fellowship trained physician and surgeon diagnoses and treats all types of medical and surgical vitreoretinal diseases. Our priority is to restore or maintain the best possible eyesight. The latest medical advances are utilized to maximize disease management. A team-based approach is applied to address your ocular condition comprehensively. We work closely with your primary eye doctor and other physicians involved in your care to not only treat your eye disease, but also to optimize your overall health.

We are committed to outstanding surgical and medical care in a compassionate and professional environment. Our devotion to your care is uncompromised.
